

LIFELADDER®

For Cantilever installation on Open Quays

Pour les installations en porte-à-faux et
les quais ouverts

**"LifeLadders with the Cantilever
option is robust and flexible
at the same time."**

*- Maintenance Manager,
Port Authority of Ålesund, November 2023*

**New Safety
Innovation**

Robust & flexible

- Allows stronger forces to bend the long cantilever arm
- Returns to its rigid and vertical position
- Avoiding costly support structures

port:safety
in the business of saving lives

Easy to find

Stays visible day and night due to its colored through material and integrated solar powered Light Unit.

Easy to climb

- for a person in distress due to the rigidity of the construction

port:safety

In recent years, the use of "Open Quay Wall" designs, with pile supported platforms, have greatly increased. This is a challenge for safety ladders and for installation costs.

LifeLadder for Cantilever installation solves these problems.
